

THE FIRST GENERATION OF A UNIVERSAL LED TILE SCREEN SYSTEM

A new generation of universal LED Tile screen system that has been developed to meet the demands of adaptability. Using a basic LED digiTILE HD with it's magnetic fixings it is possible to assemble a screen swiftly onto any magnetic surface and connect each digiTILE HD to a PDP (Power Distribution Pack) mounted close by via an umbilical cord. With digiTILE HD, it is now possible to create a screen as thin as 60mm in depth.

The latest digiTILE HD product range has been developed to cater for the HD market which fits into the standard 16:9 format providing blistering HD quality both in performance and colour technology without risking letterboxing or forced stretching to fill a screen area.
